Milo Kanz

Corvallis, Oregon | kanzm@oregonstate.edu

SUMMARY

Political Science major with a Data Science minor at Oregon State University, focused on turning survey and public-policy data into clear, evidence-based findings. Experienced in running statistical analyses in R on ANES and GSS data and currently building Python skills through an ETL project. I bring paralegal-level attention to detail and a strong interest in data handling and visualization.

EDUCATION

Oregon State University, Corvallis, OR Expected 2027

B.S. in Political Science; Minor in Data Science

Relevant coursework: Research Methods (B+) • Elementary Statistics (A) • Public Policy Problems (A) • Politics of Developing Nations (A)

EXPERIENCE

Bankruptcy Paralegal 2024 – Present

Christensen Law Office

- Prepare and file bankruptcy petitions, including schedules and the Statement of Intention, working from detailed client financial records with strict accuracy and deadline requirements.
- Perform administrative office work that keeps case files organized and complete.
- Translate complex financial and legal information into structured, standardized documents.

Survey Data Research Projects (Research Methods) Academic Projects

- Voter registration project: analyzed ANES and GSS data in R to study how online voter registration affects turnout, conditioning on education and income.
- Gender and gun control project: ran an OLS regression on GSS data across the 1980, 2000, and 2021 waves to examine how attitudes shifted over time.
- Applied regressions, chi-square tests, Pearson correlations, and difference-in-means tests to test hypotheses and interpret results.

Oregon AI Data Center Policy Paper (Group Project) Academic Project

- Researched Oregon data center regulation, covering the POWER Act (HB 3546), the Governor's data center advisory committee, and the Wasco County agriculture and Google water use dispute.
- Co-developed a proposed property tax exemption structure tied to behind-the-meter renewable energy.
- Wrote a companion policy memo translating the analysis into concise recommendations.

Clash of Clans API ETL Pipeline Personal Project (In Progress)

- Building a first extract-transform-load pipeline in Python using the Clash of Clans public API.
- Completed environment setup and the Extract step; currently debugging the Transform step.

SKILLS

Technical	R and RStudio; Python (developing); regression, chi-square, and hypothesis testing; confidence intervals; ANES and GSS datasets; API data extraction
Transferable	Data analysis; research design and writing; policy analysis; legal document preparation; attention to detail; teamwork on group projects; written communication
